

Illinois Maternal Health COUNTY PROFILES

The I PROMOTE-IL project worked with partners to select relevant, reliable, and accessible indicators to provide an interactive resource to maternal and child health stakeholders in Illinois.

This resource provides county-specific snapshots of multiple maternal health indicators.

EXAMPLE INDICATORS

- Teen birth rate
- Prenatal care utilization
- Race and ethnicity for women of reproductive age (15-44 years)
- Medicaid insurance rates

POTENTIAL USES

- Grant applications
- Reports or presentations
- State and regional quality improvement initiatives
- State and hospital level maternal morbidity and mortality reviews
- Needs assessments
